Contract Award

SUMMIT ENVIRONMENTAL CONTRACTORS WINS CONTRACT WITH AM CONCRETE For Caltrans Contract in District 5 -Santa Barbara County, California

Summit Environmental Contractors (SEC) will provide engineering support, transportation, and disposal for 5855.63 tons of and hazardous material for the California Department of Transportation (Caltrans) District 5. AM CONTRETE has awarded SEC a contract valued at \$534,142.00 to remove hazardous material prior to the construction of the US 101 which will include surface treatment and road widening. This modernization work makes the current roadway more efficient, and safer for the long term as traffic usage increases.

In addition to the transportation and disposal of hazardous material, Summit's services will also include providing plans, project management, and air monitoring. The work started in mid-January 2022 and will continue into March 2022.

AM Concrete is a division of Security Paving (SPC): who is currently #48 in ENR top transportation infrastructure contractor list in the U.S. With over 70 years of experience, Security Paving has a growing track record of project excellence within the Caltrans community.

Partnerships like this keep sustainable infrastructure projects running smooth, on time, and within budget. Summit's CEO Dave Aronne says, "We are excited to support AM Concrete in its very important role in providing Caltrans project with construction technology."

Summit Environmental Contractors is a leader in California's sustainable green technology, known for their expertise in the transportation and disposal of contaminated and hazardous material. With a proven track record for over two decades Summit is a trusted green partner to many industry leaders.
