Contract Award

SUMMIT ENVIRONMENTAL CONTRACTORS WINS CONTRACT WITH STACK AND WITBECK INC.

For Caltrans Contract in District 7 – Los Angeles County, California

Summit Environmental Contractors (SEC) will provide air monitoring, excavation transportation plan, lead compliance plan, removal and transportation for 940 tons of hazardous material for California Department of Transportation (Caltrans) District 7. This contract is awarded by Stacy and Witbeck Inc. for the Sheldon/Humboldt Pump Repair Project in Los Angeles County California.

The removal of the contaminated material is in preparation for upgrades and the repair of three existing pump plants. Before the project can begin, hazardous material contaminated with aerially deposited must be removed from the project site.

By providing air monitoring Summit is ensuring the safety of all workers, inspectors and those in the surround community. The monitoring devices will collect air samples continuously for the monitoring interval.

Stacy and Witbeck Inc. have proven themselves to be experts in the infrastructure modernization industry with over 40 years of experience and are featured in ENR Magazine as a premier construction company year in and year out. They are committed to sustainability at every level by minimizing their carbon footprint, implementing sustainable practices and like Summit, use innovative approaches to reduce waste and reuse materials when available.

Summit Environmental Contractors is a trusted partner amongst infrastructure construction leaders to provide sustainable green methods towards the modernization of California's transportation system. With over 14 years of experience, SEC has the experience and knowledge necessary to fulfil their scope of work for this project and to create a healthier and safer environment.
